ABOUT : OXXYY GROUP OF COMPANIES

Oxyy Group of Companies is more than just a supplier or multi-product specialist. With on-the-ground staff and presence in Australia, Bahrain, Canada, Germany, Qatar, Thailand, UAE, USA, the company is headquartered in India.

Oxyy supplies nanotechnology-based specialty chemicals for Oil & Gas, lubricant additives, oil packages, paint and coating additives, and cosmetic additives under their Chemical Division. Oxyy also supplies nanotechnology-based organic and biofertilizers under their Agriculture division. They also export various processed, packed, and raw food items under their Food Division and various API bulk drugs and generic medicines under their Pharmaceutical Division.

Oxyy has established itself as a well-known brand in the industry. The company's strong performance and growth may be attributed to its dependable, long-lasting, and responsive relationships with its clients and customers, as well as innovative R&D and solid on-the-ground personnel. Oxyy has a central Research & Development team which is working round the clock to enhance all the multi-division products based on latest technologies. Apart from these if the customer requires development of new products Oxyy's R&D team is always ready to take up the challenge and deliver expected results.

At Oxyy, we believe that developing solid, long-term partnerships allows us to grow together. We constantly work with our team, collaborators, partners, and clients in complete transparency. The key to success is to become familiar with current technology breakthroughs and share them with our partners and clients in order to enhance and uplift them.

OXXYY GROUP OF COMPANIES : INNOVATING THE FUTURE OF COSMETIC ADDITIVES WITH NANOTECHNOLOGY

Oxxy Group develops and manufactures specialized nanotechnology-based additives for the cosmetic industry. Our products are designed using the latest nanotechnology-based catalysts to ensure superior performance and innovative solutions for various cosmetic applications.

At the forefront of cosmetic science, Oxxy Group offers a comprehensive range of cosmetic Speciality additives tailored to enhance the performance, texture, and stability of cosmetic products. Our portfolio includes advanced rheology modifiers, such as acrylates copolymer, and other Speciality copolymers, which play a crucial role in formulating high-quality cosmetic products.

ONYFLOW® : Our Trusted Brand

Oxxy has established a trusted and well-known brand in the market under the name of ONYFLOW®. This range includes state-of-the-art rheology modifiers and Speciality copolymers designed to meet the demanding requirements of modern cosmetic formulations. Our products deliver exceptional thickening, stabilizing, and texturizing properties, ensuring optimal performance in a wide range of cosmetic applications, from skincare and haircare to color cosmetics.

White Label Solutions

Understanding the diverse needs of our clients, Oxxy also supports companies that want to source our products under white labeling based on their specific requirements. This flexibility allows businesses to leverage our cutting-edge technology while maintaining their unique brand identity.

Customized Solutions

Oxxy's R&D team is dedicated to innovation and customer satisfaction. We offer tailored solutions to meet the unique challenges and specifications of our clients. Whether it's developing a new product or optimizing an existing formulation, our team collaborates closely with clients to deliver customized additives that address specific needs and problem statements.

COSMETIC ADDITIVES : PRODUCT LIST

RHEOLOGY MODIFIERS (Acrylates Copolymer) :-

1. **Viscosity Enhancement** : Our acrylates copolymer-based rheology modifiers significantly improve the viscosity of cosmetic formulations, providing them with the desired thickness and ensuring consistency in texture.
2. **Stabilization** : These modifiers prevent the separation of components in emulsions, ensuring long-term stability and shelf life of cosmetic products.
3. **Application Ease** : They enhance the spread ability and application of products, offering a smooth and pleasant sensory experience for end-users.
4. **Formulation Versatility** : Compatible with a wide range of pH levels and other formulation ingredients, making them suitable for various cosmetic products including creams, lotions, gels, and serums.

SPECIALITY COPOLYMERS :-

1. **Film-Forming Properties** : Our Speciality copolymers form flexible, breathable films on the skin or hair, providing long-lasting effects without a heavy or sticky feel.
2. **Conditioning Effects** : Ideal for haircare products, these copolymers impart a conditioning effect, improving combability, and reducing static and frizz.
3. **Moisture Retention** : They help in maintaining moisture balance in the skin, making them essential for hydrating products such as moisturizers and serums.
4. **Enhanced Aesthetic Appeal** : These copolymers contribute to the visual and tactile appeal of cosmetic products, ensuring a luxurious feel and appearance.

Nanotechnology Integration:-

Oxyy Group employs advanced nanotechnology in the development of our additives, which allows for:

Enhanced Delivery Systems : Nano-sized particles ensure deeper and more efficient delivery of active ingredients into the skin, maximizing the efficacy of the product.

Improved Stability : Nanotechnology enhances the stability of sensitive active ingredients, protecting them from degradation and ensuring sustained release.

Oxyy Group is committed to advancing the cosmetic industry with innovative, high-performance additives. Our expertise in nanotechnology and dedication to quality ensures that our products meet the highest standards, helping our clients create superior cosmetic products that stand out in the market.

For more information or to discuss your specific needs, please contact our team. We look forward to partnering with you to revolutionize the world of cosmetics.
